Review of Erosion and Sediment Control Plan**

Mr. Young,

I have completed a review of the above referenced project regarding the Stormwater Pollution Prevention Plan/ Erosion and Sediment Control Plan for that project. The following information was reviewed:

- Stormwater Pollution Prevention Plan for Proposed FedEx Ground Facility Site Prep, Stamped by a Professional Engineer, Prepared by Fagan Engineers, Dated June 2015, Received August 10, 2015.

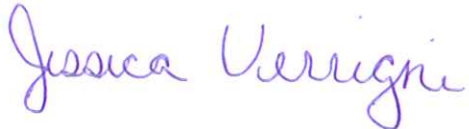

Based on my review of the above information, I believe that the Erosion and Sediment Control Plan is consistent with the Village of Horseheads' Erosion and Sediment Control Ordinance. This acceptance is conditioned upon the following:

1. This SWPPP is only for Phase 1, the initial grading of the property to prepare for future site development.
2. This approval is only for the erosion and sediment control portion of this project and is not for any post construction stormwater management practices. This erosion and sediment control plan may need to be updated once the proposed development plan is written to comply with the Villages' Stormwater Management Ordinance.
3. Silt, sediment, and/or dust shall not be allowed to leave the project site, including tracking onto public streets. Erosion and Sediment Controls, outlined in the accepted erosion and sediment control plan, shall be implemented and maintained to ensure this purpose. If silt, sediment,

and/or dust are found to be leaving the site, the Owner (or their Contractor) shall take immediate actions to correct the situation.

If you have any comments or questions regarding this letter please feel free to contact me.

Sincerely,

Jessica Verrigni, CPESC, CPSWQ
