September 8, 2015

Mr. Robert Young, Code Enforcement Officer  
Village of Horseheads  
202 South Main Street  
Horseheads, New York 14845

**Re: Review of Conceptual Stormwater Management Plan  
Proposed FedEx Ground Facility  
Center of Horseheads, Village of Horseheads**

Mr. Young:

As per the Village's request, I have prepared this letter to comment upon the conceptual stormwater management plan for the above-referenced project that has been prepared by Fagan Engineers. Based upon my review of the design information submitted to date and conversations with the design engineer, I feel that the conceptual stormwater management plan for this project has merit and appears to be workable. The submitted information included the results of test pits (used to identify groundwater elevation) and infiltration tests.

Upon discussion with Fagan Engineers, the complete SWPPP is being prepared at this time and will be submitted in the near future. I will complete a detailed review of that SWPPP at that time. If you have any questions or comments regarding this letter, please do not hesitate to contact me.

Sincerely,

Jimmie Joe Carl, P.E.
